Title : The Influence Of The Lecturer Competence Pedagogy and
Competence Professional to Increase the Student Learning
Motivation*

Learning is the one the requirement that affected to the student progress. Someone can be good or bad in the class not depends on the learning, the highest motivation to learn about something is the important one. From the observation, student have a less motivation on learning that see from less activities to asked, talking with someone else, disturbing others, cheating the friends work and not doing the task. The purpose of student motivation base on lecturers' pedagogy competence, professional competence work simultaneously. The Population of this research were student of Hotel Business Program University of Agung Podomoro total was 262 student was base from batch 2016 (88 student), 2017 (108 Student) and 2018 (154 Student). The result for this research was, there is influence between pedagogic competence and the professional competence lecturers' for student motivation from SPSS output is having influence for competence pedagogic and competence professional for motivation of 28,5% that received from SPSS output from regression linear for knowing the partial determination (R^2). Based on result above, pedagogy and professional competence of lecturers that influence of student motivation for learning in the class. So that, lecturers must improves the how to teach and make the environment of learning was good and give the present as appreciation that student can do the best in the class.
