*Title : Restaurant Lifestyle Changes in Pandemic Time.*

*During this pandemic, many restaurants began to decline due to the existence of a Large-Scale Social Restriction (PSBB) but with such circumstances there were several restaurants that accepted online orders such as delivery and also dine-in like eating in a car. During this pandemic there are not many restaurants to take the risk of breaking the fast but there are restaurants that have the courage to continue with the changing ways they have. When the restaurant was still operating during this pandemic, they wanted their customers to be able to eat food in their restaurant in a safe way for them to gaze at their favourite food.*

*With Jakarta for so long implementing a Large-Scale Social Restriction (PSBB), Jakarta finally implemented a New Normal where all would operate again on one condition that they had to apply an existing Health protocol. In New Normal, there are many restaurants that have a different lifestyle than before, where there is one restaurant in Jakarta that has improved the special Health protocol system. In order to minimize direct contact with visitors and restaurant employees.*

***Keywords: PSBB, pandemic period, restaurants, lifestyle, health protocol.***
