

## ABSTRACT

Name : Alexander Bong  
Study Program : Architecture  
Title : Senior High School Design with Expressionism Architecture  
Approach in Jakarta

*Indonesia's education index is still relatively low, Indonesia ranks seventh in ASEAN. Education is organized by examples, building will, and developing students' creativity in the learning process. Students are required to be creative and innovate but the ability of schools in Indonesia to be a good place to unleash the potential of these students is still relatively low. Bad things in the development of learning have 2 things that are the main focus namely, behavior and emotion. The main concern is the high school (high school) which is in a trial and error period. In its completion, an expressionism architectural approach was used which was easier to express feelings into building designs. What will be sought is how to apply school design with this expressionism approach. To find out expressions that really reflect a trait, a survey will be conducted to get the most number that describes these expressions.*

*Keywords : Senior High School, Behaviour, Emotion, Expresionism, Architecture*
