Title : Java Preanger Coffee Odyssey: From Beans to Cup

In this period, coffee is one of the most often consumable drink for all aged people. Usually Indonesian make coffee to be the part of their social life. However not all Indonesian know the process how to make coffee, from picking up the coffee fruit till roasting process to become a cup of coffee. The main purpose of this sotrytelling is to give knowledge about coffee start from harvest its fruit, then farmer will wash and separate the seeds, then it will go to depulper machine to separate the skin and the flesh of the fruit. After that the seed would be dried till the agreeable moisture and will be pilled to become green bean. Last it would be roasted until the desired ripeness, then it would go through the cupping process before it is sold at the market. The method of data collection is using a Qualitative Method for making this thesis about Java Preanger Coffee Odyssey: From Beans to Cup. The research will based in Nekarabo Coffee's farm located on Pangalengan, West Java. The research will show the journey of coffee from the cherry beans until it's served on the table.
